

## § 1.167(b)-0

## 26 CFR Ch. I (4-1-10 Edition)

gain or loss from the sale, exchange, or other disposition of the rights. Thus, if some (but not all) of the rights in a pool become worthless as a result of prepayments, no loss is recognized by reason of the prepayment and the adjusted basis of the pool is not affected by the unrecognized loss. Similarly, any amount realized from the sale or exchange of some (but not all) of the mortgage servicing rights is included in income and the adjusted basis of the pool is not affected by the realization.

(ii) *Multiple accounts.* If the taxpayer establishes multiple accounts within a pool at the time of its acquisition, gain or loss is recognized on the sale or exchange of all mortgage servicing rights within any such account.

(3) *Additional rules.* Rules similar to those in § 1.197-2(f)(1)(iii), (f)(1)(iv), and (f)(2) (relating to the computation of amortization deductions and the treatment of contingent amounts) apply for purposes of this paragraph (d).

(e) *Effective dates—(1) In general.* This section applies to property acquired after January 25, 2000, except that § 1.167(a)-14(c)(2) (depreciation of the cost of certain separately acquired rights) and so much of § 1.167(a)-14(c)(3) as relates to § 1.167(a)-14(c)(2) apply to property acquired after August 10, 1993 (or July 25, 1991, if a valid retroactive election has been made under § 1.197-1T).

(2) *Change in method of accounting.* See § 1.197-2(l)(4) for rules relating to changes in method of accounting for property to which § 1.167(a)-14 applies. However, see § 1.168(k)-1(g)(4) or 1.1400L(b)-1(g)(4) for rules relating to changes in method of accounting for computer software to which the third sentence in § 1.167(a)-14(b)(1) applies.

(3) *Qualified property, 50-percent bonus depreciation property, qualified New York Liberty Zone property, or section 179 property.* This section also applies to computer software that is qualified property under section 168(k)(2) or qualified New York Liberty Zone property under section 1400L(b) acquired by a taxpayer after September 10, 2001, and to computer software that is 50-percent bonus depreciation property under section 168(k)(4) acquired by a taxpayer after May 5, 2003. This section also applies to computer software that

is section 179 property placed in service by a taxpayer in a taxable year beginning after 2002 and before 2010.

[T.D. 8867, 65 FR 3825, Jan. 25, 2000, as amended by T.D. 9091, 68 FR 52990, Sept. 8, 2003; T.D. 9283, 71 FR 51737, Aug. 31, 2006]

### § 1.167(b)-0 Methods of computing depreciation.

(a) *In general.* Any reasonable and consistently applied method of computing depreciation may be used or continued in use under section 167. Regardless of the method used in computing depreciation, deductions for depreciation shall not exceed such amounts as may be necessary to recover the unrecovered cost or other basis less salvage during the remaining useful life of the property. The reasonableness of any claim for depreciation shall be determined upon the basis of conditions known to exist at the end of the period for which the return is made. It is the responsibility of the taxpayer to establish the reasonableness of the deduction for depreciation claimed. Generally, depreciation deductions so claimed will be changed only where there is a clear and convincing basis for a change.

(b) *Certain methods.* Methods previously found adequate to produce a reasonable allowance under the Internal Revenue Code of 1939 or prior revenue laws will, if used consistently by the taxpayer, continue to be acceptable under section 167(a). Examples of such methods which continue to be acceptable are the straight line method, the declining balance method with the rate limited to 150 percent of the applicable straight line rate, and under appropriate circumstances, the unit of production method. The methods described in section 167(b) and §§ 1.167(b)-1, 1.167(b)-2, 1.167(b)-3, and 1.167(b)-4 shall be deemed to produce a reasonable allowance for depreciation except as limited under section 167(c) and § 1.167(c)-1. See also § 1.167(e)-1 for rules relating to change in method of computing depreciation.

(c) *Application of methods.* In the case of item accounts, any method which results in a reasonable allowance for depreciation may be selected for each item of property, but such method must thereafter be applied consistently

## Internal Revenue Service, Treasury

## § 1.167(b)-1

to that particular item. In the case of group, classified, or composite accounts, any method may be selected for each account. Such method must be applied to that particular account consistently thereafter but need not necessarily be applied to acquisitions of similar property in the same or subsequent years, provided such acquisitions are set up in separate accounts. See, however, § 1.167(e)-1 and section 446 and the regulations thereunder, for rules relating to changes in the method of computing depreciation, and § 1.167(c)-1 for restriction on the use of certain methods. See also § 1.167(a)-7 for definition of account.

### § 1.167(b)-1 Straight line method.

(a) *In general.* Under the straight line method the cost or other basis of the property less its estimated salvage value is deductible in equal annual amounts over the period of the estimated useful life of the property. The allowance for depreciation for the taxable year is determined by dividing the adjusted basis of the property at the beginning of the taxable year, less salvage value, by the remaining useful life of the property at such time. For convenience, the allowance so determined may be reduced to a percentage or fraction. The straight line method may be used in determining a reasonable allowance for depreciation for any property which is subject to depreciation under section 167 and it shall be used in all cases where the taxpayer has not adopted a different acceptable method with respect to such property.

(b) *Illustrations.* The straight line method is illustrated by the following examples:

*Example 1.* Under the straight line method items may be depreciated separately:

Year and item	Cost or other basis less salaries	Useful life (years)	Depreciation allowable		
			1954	1955	1956
1954:					
Asset A .....	\$1,600	4	<sup>1</sup> \$200	\$400	\$400
Asset B .....	12,000	40	<sup>1</sup> 150	300	300

<sup>1</sup>In this example it is assumed that the assets were placed in service on July 1, 1954.

*Example 2.* In group, classified, or composite accounting, a number of assets with the same or different useful lives may be

combined into one account, and a single rate of depreciation, *i.e.*, the group, classified, or composite rate used for the entire account. In the case of group accounts, *i.e.*, accounts containing assets which are similar in kind and which have approximately the same estimated useful lives, the group rate is determined from the average of the useful lives of the assets. In the case of classified or composite accounts, the classified or composite rate is generally computed by determining the amount of one year's depreciation for each item or each group of similar items, and by dividing the total depreciation thus obtained by the total cost or other basis of the assets. The average rate so obtained is to be used as long as subsequent additions, retirements, or replacements do not substantially alter the relative proportions of different types of assets in the account. An example of the computation of a classified or composite rate follows:

Cost or other basis	Estimated useful life (years)	Annual depreciation
\$10,000	5	\$2,000
10,000	15	667
20,000		2,667

Average rate is 13.33 percent (\$2,667÷\$20,000) unadjusted for salvage. Assuming the estimated salvage value is 10 percent of the cost or other basis, the rate adjusted for salvage will be 13.33 percent minus 10 percent of 13.33 percent (13.33% - 1.33%), or 12 percent.

*Example 3.* The use of the straight line method for group, classified, or composite accounts is illustrated by the following example: A taxpayer filing his returns on a calendar year basis maintains an asset account for which a group rate of 20 percent has been determined, before adjustment for salvage. Estimated salvage is determined to be 6% percent, resulting in an adjusted rate of 18.67 percent. During the years illustrated, the initial investment, additions, retirements, and salvage recoveries, which were determined not to change the composition of the group sufficiently to require a change in rate, were assumed to have been made as follows:

1954—Initial investment of \$12,000.  
1957—Retirement \$2,000, salvage realized \$200.  
1958—Retirement \$2,000, salvage realized \$200.  
1959—Retirement \$4,000, salvage realized \$400.  
1959—Additions \$10,000.  
1960—Retirement \$2,000, no salvage realized.  
1961—Retirement \$2,000, no salvage realized.
